International Conference on Maritime Technology and Engineering

The National Conferences in Naval Architecture and Marine Engineering began in 1987, jointly organised by Instituto Superior Técnico and the Naval Architecture and Marine Engineering Section of the Portuguese Association of Engineers (Colégio de Engenharia Naval da Ordem dos Engenheiros). The event was initially organised annually, later becoming biannual, with one edition in 1997 organised in conjunction with the Association of Naval Architects of Spain.

Having overcome the pandemic situation, which we suffered between 2020 and 2022, and having already organised MARTECH 2024 in situ, it is refreshing to organise MARTECH 2026 with delegates in person.

The Conference will continue to have a broad scope, covering all aspects of maritime activity including:

- Ship Design (structures, hydrodynamics, machinery)
- Ship Operation
- Ship Building and Repair
- Maritime Transportation and Ports
- Fishing and Aquaculture
- Offshore Energy Resources
- Military and Surveillance Vessels
- Recreational Craft and Maritime Tourism

The official language of the event is English.

At the same time, and at the same location, the National Conference in Portuguese will be held in parallel sessions.
